- Self-motivated, Team player with ability to learn and adapt quickly to the emerging new technologies.

Skills

- **Programming Language-** JavaScript, Java, SQL,
- **Web Technologies –** HTML, CSS, JavaScript, JSON, WebAPI,
- **Frameworks -** NodeJs/Express, ReactJs, Bootstrap, Tailwind,
- **Database Management System-** MySQL , firebase,
- **API calls –** REST(Fetch, Axios, React-query) , GraphQL(Apollo),
- **Application/Web Servers-** GitHub, BitBucket,
- **IDE –** Visual Studio code, Eclipse,
- **Project Management tools -** GitHub Issues, Jira, Notion,
- **Methodologies and concepts –** Agile,
- **Operating Systems –** WINDOWS.

Other Skills: Java, spring, PHP, CodeIgniter.

Work history

Fullstack Developer, Febuary 2024 - present
Camtrack SAS – Douala

Ymane Bot (Whatsapp bulk messages) | démo
 A Whatsapp bulk messsages plateforme.

| React JS | NodeJs | ExpressJS | Whatsapp API | GIT | JavaScript |

WhatsApp Chatbot | démo
 I've set up a WhatsApp chatbot that allows any camtrack customer to know the position of their vehicle in real time. The real goal of this project is to extend the scope, operations and global reach through WhatsApp, personalize and automate customer interaction, automate tasks and improve engagements (non-reporting, maintenance, etc.), optimize after-sales services with efficient chatbots 24/7 .

| NodeJs | ExpressJS | Whatsapp API | Axios | GIT | JavaScript |

Automatisation des Rapports | démo
 The after-sales service department had to transmit certain infringement or journey reports in Excel format from the vehicle fleets to their customers on a weekly, monthly or even daily basis. This was very tedious for the team, given the number of reports to customize and send. Hence the creation of an application or platform to solve this problem.

| NodeJs | Express Js | ExcelJS | Axios | GIT | JavaScript |

Frontend Developer (freelance), Febuary 2024 – October 2024
BandeSoft GMBH – Remote

I was in charge of developing new features, bug fixes and evolutionary maintenance for the Fast Delivery SQUAD project. More specifically, the QR Code, Customer Website and Admin Panel. (https://fd-squad.com/, https://admin.fd-squad.com/, https://qrcode.fd-squad.com/)

| Next Js | React Js | GIT | CI/CD |

Frontend Developer, 2019 - Current
AMH Consulting Group – Douala

Zencollect (Microfinance daily collection application) | demo
This platform enables microfinance collectors to carry out their operations in the field from a mobile application in total security, and gives the microfinance company real-time control over the cash inflows and outflows of its collection agents in the field. It also enables customers to track all their transactions via a mobile application**.**

- I designed a dashboard from scratch which allows users or administrators to view inflows and outflows in the field,
- Implement KPI of all agents in the field,
- Implement authentication,
- Implement roles management of users and administrator. Around 5 users, and all users have different dashboard view after logged in,
- Implement branch management,
- CRUD and validations of customers,
- CRUD and activation of field Agents.

| React | GIT | JavaScript | Bootstrap | ChartJs | Axios |

BulkSMS (prototype) | demo
A bulk messages App

- I Implement send messages functionality with Focus target API,
- CSV importation,
- Dashboard view (number of campaign, numbers of sms sent successfully or not, statistics on campaigns and sms…),
- Save contacts from csv file

| React | HTML | CSS | JavaScript | GIT |

Zencarto (prototype)

An urban community application for collecting and mapping data on taxpayers in a geographical area, offering excellent tracking of tax payments.

- I designed dashboard to allow the mayor to visualize tax collections,
- Implement authentication,
- Implement a map view of all taxes by area with details of due ,

| React | HTML | CSS | JavaScript | GIT |

Screenshots

Permis a point

Web-based fleet management platform (insurance, assignment, maintenance) with a module for managing offences committed by drivers. Actually in production in the SABC Group Cameroon

- I was in charge of UI,
- I designed all the pages and convert figma files to html for some cases,
- I convert and import all the design pages to code-igniter MVC patterns,
- I implement branch management,
- Implement the driver's portals to visualize dear remaining points and dear offences committed.
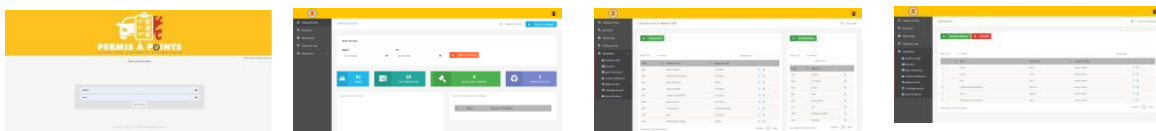

| PHP | Code-igniter | HTML | CSS | GIT | Bitbucket |

Screenshots

ZenOutdoor | demo

Application for collecting and geolocating points of sale, billboards and other points of interest.

- I designed all needed pages from scratch,

| PHP | Code-igniter | HTML | CSS | GIT | Bitbucket |

- I convert and import all the design pages to code-igniter MVC pa
